

# Mobile Field Investigation for Law Enforcement

FIWorks™, Mobizent's mobile field investigation application, provides law enforcement departments the ability to collect data electronically in the field for investigative purposes.

FIWorks™, is a comprehensive Law enforcement tool to easily collect Field investigation data on any mobile device. FIWorks™ not only allows rapid entry of data, but the FI can be quickly connected to our TicketWorks™ and IDMobile™ products.. Designed to run on any windows based Mobile Device, FIWorks™ provides highly sophisticated entry screens that intelligently work together to allow officers to capture data in the least amount of time. FIWorks™ is an electronic version of interview cards that serves as a source of information, means of identifying and obtaining suspect information.

The image shows two overlapping screenshots of the FIWorks application interface. The top screenshot is the 'Subject' form, which includes fields for Type (set to 'Driver'), SSN, ID#, Last Name, First Name, Middle Name, Street Num, City (San Jose), ID State (CA), and a checkbox for 'Is DL Comme'. The bottom screenshot is the 'Vehicle' form, which includes fields for Plate, VIN, State (CA), Body Style, Color, Make, Model, Year, Insurance Comp (Other), and Policy#. It also has checkboxes for 'Commercial Vehicle', 'Hazardous', and 'Owner Responsibility', and an 'Owner' button.

FIWorks™ also allows officers to record their daily observations and daily activity. FIWorks can also be used a tool to monitor and suspected racial profiling. Basically, FIWorks™ improves data collection , eliminates errors and eliminates the need to re-enter data into your RMS systems.

FIWorks™ is a cost-effective solution that reduces the amount of time spent by officers, like our TicketWorks™ solution to scan/swipe Drivers Licences and scan registrations to capture all vehicle information.

FIWorks™ also has a comprehensive backoffice that seamlessly integrates into any agencies RMS system. FIWorks™ back-office solution provides exhaustive "Investigative Search" feature provides data analysis and data visualization capabilities to allow officers the ability to search data for any crime investigation. FIWorks™ can also print any FI if required. In addition, FIWorks™ also provides latest technological features like capturing GPS co-ordinates for Location address, photo capture and Voice Recording,

## Features of FIWorks:

- » Electronic scan/swipe of license and registration
- » Pre-defined lists and options
- » Investigative Search
- » Advanced security features (biometric, signature validation)
- » Wireless or Direct Synchronization
- » Customizable to Department requirements

## Benefits:

- » Simplifies and streamlines ticket writing
- » Reduces paperwork
- » Reduces Carbon Footprint
- » Ensures data integrity
- » Enhances data analysis and visualization
- » Increases officer productivity
- » Integrates with Department RMS
- » Increase collection of online critical data

Officers in the field can use FIWorks™ anytime they feel circumstances constitute reasonable suspicion. FIWorks™ allows officers to collect subjects demographic information and vehicle information, it also helps officers in collecting gang related information. FIWorks™ also provides a built-in investigative questionnaire that any traffic officer or patrol officer can use for collecting additional information about the subject that otherwise would not have been collected in the field.
