

# Improving Section 8 Housing through Inspections

InspectSec8™, Mobizent's mobile in-field inspection solution provides an automated method to consistently and effectively collect and maintain Section 8 Housing inspections.

InspectSec8™, Mobizent's innovative Mobile Inspection Solution, is revolutionizing the way inspection companies and Housing Authorities perform inspections such as building, electrical, plumbing and much more.

With InspectSec8™, inspectors can perform field inspections electronically, eliminating the need for paper forms, clipboards and avoid re-entry of data. In addition to standard data capture, InspectSec8™ provides the ability to capture drawings, pictures or photos including signatures and audio. InspectSec8™ eliminates the need to remember complex codes, laws and bylaws etc. by automating the entire task with pull-downs and online searches.

The screenshot shows a mobile application interface for 'Job Details'. It includes a 'General Info' section with fields for 'Inspection No.', 'Date Time', 'Address', and 'Owner Name'. Below this is a table for 'INSPECTION GENERAL INFORMATION' with columns for 'Section', 'Loc', 'Tenant ID No.', 'Inspector', 'Type of Ins.', 'Neighborhood/Tract', 'Date of Req.', 'Date of Ins.', and 'Date Last Ins.'. There are also fields for 'Project Number', 'Ins. Info', 'General Info', 'Housing Type', and 'Agent Address'. Navigation buttons like 'File', 'Cancel', and 'Save Next' are visible at the bottom.

Field inspectors can synchronize remotely using wireless technology or using the standard synchronizing methods at the office. InspectSec8™ provides the ability to review or lookup previous inspections on demand and standardizing the way an inspection report is written. It also provides the management and control of properties to meet new HUD requirements for property management. The solution not only allows provides the handheld mobile front-end solution but also provides a

complete and feature rich back-office solution to manage the inspections. Inspections can have approval cycles and roll-up reports to meet the critical time-based HUD requirements connections to anytype of mobile solution for each property. Designed to run on any windows based Mobile Device, including phones, laptops or ruggedized handhelds, InspectSec8™ provides highly sophisticated service modules that intelligently work together to allow users to monitor and control inspections, from a call center solution to scheduling and mapping locations needed for maintenance and inspection personnel.

InspectSec8™ is a cost-effective solution that reduces the amount of time spent on manual inspections and manual reporting by allowing users to capture all the required information and approvals on the electronic device or website.

InspectSec8™ ensures that the entire inspection process is streamlined, from the initial entry of the information through the reporting and data collection analysis, to ensure that Housing Authorities save time and money.

## Features of InspectSec8:

- Integrated Section 8 required fields
- Capture Voice recordings
- Embed Photographs & sketches
- Easy entry from multiple devices
- Full reporting and exporting abilities
- Advanced security features (signature validation)
- Customizable to Authorities requirements

## Benefits of InspectSec8:

- Simplifies and streamlines inspection mangement
- Reduces errors, re-work and paperwork
- Reduces Carbon Footprint
- Ensures data integrity
- Enhances data analysis and visualization
- Increases productivity
- Integrates with Department network
