

Managing Inventories for Housing Authorities

InventoryMgr™, Mobizent's Web-based Inventory Management solution provide Housing Authorities with a customized inventory solution built for the new HUD requirements for property management.

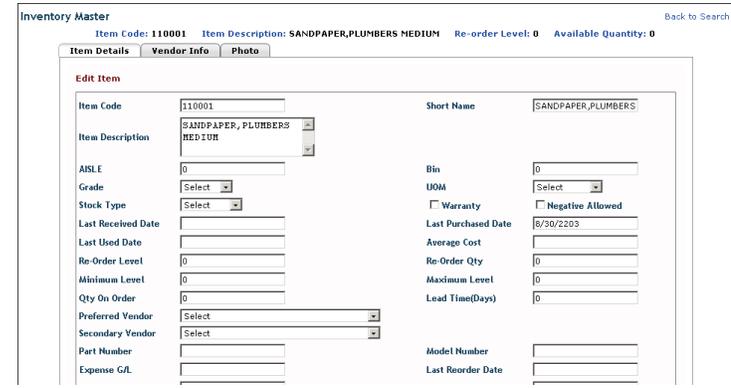

InventoryMgr™, is a comprehensive back-office solution for Housing Authorities. It provides the management and control of critical inventories by property to meet new HUD requirements for property management. The solution not only allows Purchase Requests and Orders Issuance with approval cycles but also a complete connection to anytype of mobile solution in the field such as WorkOrderWorks to provide realtime interfaces to the inventory database. Designed to run on any windows based Mobile Device, including phones, laptops or ruggedized handhelds, InventoryMgr™ provides

a complete inventory entry solution provided at remote stations or Handhelds at the loading docks and can eliminates the need to re-enter data into additional systems and constantly conduct inventory counts.

InventoryMgr™ is a cost-effective solution that reduces the amount of time spent on manual inventory counts and manual Purchase Order routing by allowing users to capture all the required information and approvals on the Website. In addition, InventoryMgr™ also provides latest HUD requirements like property management roll-ups.

InventoryMgr™ ensures that the entire inventory process is streamlined, from the initial entry of the information through the reporting and data collection analysis, to ensure that Housing Authorities save time and money. InventoryMgr™ "Investigative Search" feature provides data analysis and data visualization capabilities to users during any inventory issues.

InventoryMgr™ also provides a complete reporting solution and export features so the inventory can be interfaces with your existing General ledger and Tenant Management Solutions
